Dave-

I think you have seen it but wanted to make sure that I had followed through (and the presence of it on my desktop saved out of our electronic content system seemed to indicate that I had. Just belts and suspenders over here.

Thanks Rik- We will look at this but I think maybe we've already seen it (?). We look forward to receiving the material you folks said you would develop concerning your legal interpretations of permitting requirements and technical evaluation of how monthly limits would protect against acute toxicity. Please give me a call if we need to talk. We look forward to working with you to get this resolved.

Subject: Tox Plan - current version

Dave-

I am pretty sure I sent this to you but since Tam asked about the status of the amendments at the Board meeting I wanted to make sure you had the current version that we will be working from. Please note that we have not touched this in months now and there are some clean-ups/changes that we will make but don't want to go back into the document until we have a clear direction on where we are going.

Rik
